1. @hidreams__ (Hi Dreams) - 7.2K followers

Hey Hi Dreams!

Saw your growth strategy work and Degen Noobs community. Impressive!

I'm Samuel, founder of @DecaFlow - first privacy-focused cross-chain DEX on Base.

Quick value prop: Your degens get to trade WITHOUT bots front-running them or copycats tracking their wallets. We're offering your community:

- 30% revenue share on ALL swap fees (forever) • VIP fees for your community (33% discount) • Telegram bot integration • No upfront payments - 100% performance-based

The math: If your community does \$1M monthly volume, that's \$900-\$1,200/month to YOU in passive income.

We're Nigerian too and looking to partner with real communities, not just influencers.

Interested? Hit me up on Telegram @defidboss and I'll send you the full breakdown + how we can white-label this for Degen Noobs.

I'm Samuel, founder of @DecaFlow - first privacy-focused cross-chain DEX on Base.

Quick value prop: Your massive community gets private trading (no bots, no copycats, no wallet tracking). You get:

- With 395K followers, this could be \$5-10K+/month passive income
- VIP fees for your Telegram community
- Telegram bot integration

The math: If just 1% of your 395K does \$1M monthly volume, that's \$900-\$1,200/month to YOU. Scale that up = serious money.

Fits your educator brand perfectly - teach them about privacy trading while earning passive income.
