

Partnership Proposal

ENB (Everybody Needs Base) × DecaFlow Protocol

Date: December 28, 2025

Prepared For: ENB Marketing Team

Prepared By: Ofem Mbang, Founder - DecaFlow Protocol

Contact: hello@affidexlab.com | t.me/decaflowprotocol

Executive Summary

DecaFlow Protocol seeks a strategic marketing partnership with ENB to accelerate user acquisition, increase platform visibility, and establish DecaFlow as the leading privacy-first DEX on Base.

Current Status: - Live on mainnet (launched December 20, 2025) - Multi-chain support (6 chains including Base) - Privacy swap integration via CoW Protocol - DLMM liquidity pools deployed - Gamification system (Pioneer 100, Quests, Leaderboard)

Partnership Goal: Drive 5,000+ active users and \$5M+ in trading volume within 90 days through coordinated marketing efforts.

Budget Reality: Zero cash budget, but substantial value-sharing opportunities through revenue, tokens, and strategic positioning.

About DecaFlow Protocol

Website: <https://decaflow.xyz>

Twitter: @DecaFlow

Tagline: “Trade Privately. Move Quietly. Earn Densely.”

What We Built

DecaFlow is a **private liquidity layer** for Base and beyond, combining:

- **Privacy Flow Engine** - CoW Protocol routing eliminates MEV and front-running
- **DLMM Liquidity Pools** - 3-5x better capital efficiency than traditional AMMs
- **Secure Cross-Chain** - Chainlink CCIP + Circle CCTP bridging across 6 chains
- **Base Native** - Built on Coinbase’s L2 infrastructure
- **Gamified Rewards** - Pioneer 100 program, weekly prize pools, quests system

Why DecaFlow Matters for Base

1. **First full-stack privacy DEX on Base** - unique value proposition
 2. **Institutional-grade infrastructure** - Chainlink, Circle, CoW Protocol
 3. **Real product, real traction** - not vaporware, already live
 4. **Community-first approach** - gamification drives organic engagement
 5. **Revenue-generating** - sustainable business model from day one
-

Partnership Objectives

What DecaFlow Needs from ENB

Phase 1: Awareness (Weeks 1-4)

- Social media amplification (Twitter Spaces, threads, quote tweets)
- Feature in ENB newsletter/blog (guest post or profile piece)
- Introduction to Base ecosystem projects for cross-promotion
- Community channel announcements (Telegram, Discord, Farcaster)

Phase 2: Engagement (Weeks 5-8)

- Co-hosted Twitter Spaces or AMAs (weekly or bi-weekly)
- Campaign support for DecaFlow quests and challenges
- ENB community exclusive quest/challenge with bonus rewards
- Content collaboration (infographics, explainer videos, memes)

Phase 3: Retention (Weeks 9-12)

- Case studies and success stories featuring DecaFlow users
- Ongoing social media support (weekly mentions, engagement)
- Referral program promotion to ENB audience
- Long-term strategic advisory on Base ecosystem positioning

Success Metrics (90-Day Target)

Metric	Current	Target	Growth
Active Users	~50	5,000+	100x
Trading Volume	<\$100K	\$5M+	50x+
Twitter Followers	~500	5,000+	10x
Telegram Members	~100	2,000+	20x
Pioneer 100 Spots Filled	~20	100	5x

Value Proposition for ENB

What ENB Gets (Zero Cash, High Value)

1. Revenue Sharing Agreement

Structure: 10% of all platform fees generated from ENB-referred users (tracked via referral codes/UTM parameters)

Revenue Breakdown: - Swap fees: 0.3% per trade - Cross-chain fees: 0.1% premium - Privacy premium: 0.05% (optional) - LP management fees: 10% of DLMM profits

Example Scenario: - 1,000 ENB-referred users - Average \$500 monthly volume per user - Total monthly volume: \$500,000 - Platform fees (0.3%): \$1,500 - **ENB's 10% share: \$150/month**

Scaling Potential: - 5,000 users $\times$ \$500 avg = \$2.5M monthly volume - Platform fees: \$7,500/month - **ENB's share: \$750/month** (\$9K annually) - Plus growth potential as DecaFlow scales

2. \$DECA Token Allocation

Allocation: 2% of Community Airdrop (6M \$DECA tokens)

Distribution Options: 1. **ENB Treasury:** 3M \$DECA (50%) - vested over 12 months 2. **ENB Community Rewards:** 3M \$DECA (50%) - distributed to ENB members who use DecaFlow

Estimated Value (Conservative): - If \$DECA launches at \$0.05: 6M tokens = \$300K - If \$DECA reaches \$0.10: 6M tokens = \$600K - Market-driven upside potential

Timeline: Token Generation Event (TGE) scheduled Q2 2026

3. Exclusive Partnership Benefits

Priority Placement: - ENB projects get priority listing on DecaFlow (when we add token listings) - Featured partner section on DecaFlow website - Co-branded marketing materials

Exclusive Community Access: - ENB community gets 1.5x points multiplier on all DecaFlow activities - Early access to new features and campaigns - Exclusive ENB-only quests with higher rewards

Strategic Advisory: - ENB team gets input on DecaFlow marketing strategy - Quarterly partnership reviews with growth insights - Collaborative campaign planning

4. Cross-Promotion Opportunities

DecaFlow Will Promote ENB: - Regular shoutouts to @ENB on DecaFlow Twitter - ENB featured in DecaFlow newsletter (when launched) - "Powered by ENB" badge on promotional materials - Case study: "How ENB Helped DecaFlow Scale on Base"

Content Collaboration: - Joint Twitter threads, infographics, educational content - Co-hosted events (AMAs, workshops, competitions) - Shared content calendar for maximum impact

5. Data & Insights Sharing

Analytics Dashboard Access: - Real-time metrics on ENB-referred user activity - Volume, swaps, retention data for campaign optimization - Insights into Base ecosystem DeFi behavior

Market Intelligence: - Share learnings about Base user preferences - Feedback loop for ENB's other portfolio projects - Collaborative research on DeFi trends

Proposed Partnership Structure

Partnership Tiers (Choose One or Hybrid)

Option A: Performance-Based Model

- **ENB Investment:** Marketing support (social, content, intros)

- **ENB Returns:** 10% revenue share + 2% token allocation (6M \$DECA)
- **Duration:** 12 months initial term, renewable
- **Tracking:** Custom referral codes, UTM parameters, on-chain analytics

Option B: Equity + Tokens Model (If ENB Prefers)

- **ENB Investment:** Deeper partnership (dedicated campaign manager, premium placements)
- **ENB Returns:** 15% revenue share + 3% token allocation + equity conversation in Seed round
- **Duration:** 24 months, first right of refusal on next partnership tier

Option C: Hybrid Pilot (Recommended)

- **ENB Investment:** 90-day pilot with moderate support (Phase 1 + 2 activities)
- **ENB Returns:** 10% revenue share during pilot + 1.5% token allocation (4.5M \$DECA)
- **Evaluation:** Review at Day 90, scale up to Option B if metrics hit targets
- **Low Risk:** Both parties test chemistry and effectiveness before deeper commitment

Recommended: Option C (Hybrid Pilot)

Why This Works: - Low commitment, high learning for both sides - Clear 90-day milestone to evaluate success - Flexibility to scale up or adjust based on results - ENB gets immediate token upside + revenue share - DecaFlow gets critical early-stage visibility

Implementation Roadmap

Month 1: Foundation (Weeks 1-4)

Week 1: Launch - Finalize partnership agreement - Set up tracking infrastructure (referral codes, analytics) - Create co-branded marketing assets - Announce partnership on both channels

Week 2-3: Awareness Blitz - ENB Twitter thread introducing DecaFlow - Guest post on ENB blog: “Why Base Needs Privacy DeFi” - Co-hosted Twitter Space: “The Future of Private Trading” - ENB newsletter feature

Week 4: Community Activation - Launch ENB-exclusive quest on DecaFlow (1.5x points multiplier) - Telegram/Discord announcements - Meme contest with \$DECA prizes

Month 2: Engagement (Weeks 5-8)

Week 5-6: Content Collaboration - Weekly Twitter threads (co-authored) - Educational video series: “How to Use DecaFlow” - Infographics on privacy benefits

Week 7-8: Community Campaigns - Trading competition for ENB community - Referral challenge: “Bring 3 Friends, Win Prizes” - AMAs with DecaFlow team in ENB channels

Month 3: Scaling (Weeks 9-12)

Week 9-10: Case Studies - Publish user success stories - Data showcase: Volume growth, user acquisition - Partnership impact report

Week 11-12: Review & Optimize - 90-day performance review - Revenue share payout #1 - Decide on partnership continuation/upgrade - Plan next quarter if successful

Success Scenarios & Revenue Projections

Conservative Scenario (Baseline)

- 2,000 ENB-referred users in 90 days
- \$1M cumulative volume
- Platform fees: \$3,000
- **ENB Revenue Share: \$300** (first 90 days)
- **Plus 4.5M \$DECA tokens** (valued at \$225K at \$0.05 TGE)

Moderate Scenario (Target)

- 5,000 ENB-referred users in 90 days
- \$5M cumulative volume
- Platform fees: \$15,000
- **ENB Revenue Share: \$1,500** (first 90 days)
- **Plus 4.5M \$DECA tokens** + scale-up to Option B

Optimistic Scenario (Stretch)

- 10,000+ ENB-referred users in 90 days
- \$10M+ cumulative volume
- Platform fees: \$30,000+
- **ENB Revenue Share: \$3,000+** (first 90 days)
- **Plus upgraded token allocation** (move to 3-4% airdrop allocation)

Long-Term Upside: - Ongoing revenue share as DecaFlow scales - \$DECA token appreciation potential - Portfolio success story for ENB - First-mover advantage in Base DeFi partnerships

Why This Partnership Works

For ENB:

Zero Risk - no upfront payment required, performance-based rewards

High Upside - revenue share + token allocation with growth potential

Portfolio Diversification - first privacy DEX partnership on Base

Proof of Concept - DecaFlow is live, not pre-launch vapor

Strategic Positioning - early bet on privacy as next DeFi narrative

Community Value - ENB members get exclusive benefits (1.5x multiplier, quests)

For DecaFlow:

Instant Credibility - ENB endorsement validates us in Base ecosystem

Targeted Reach - ENB audience = Base-native DeFi users (perfect fit)

Expert Guidance - ENB knows Base marketing better than anyone

Network Effects - intros to other Base projects for partnerships
Sustainable Model - revenue share aligns incentives long-term
Scalable - starts small, grows as we grow

Legal & Administrative

Tracking & Transparency

- **Referral Codes:** Custom ENB codes for social/content campaigns
- **UTM Parameters:** Track all ENB-driven traffic
- **On-Chain Analytics:** Verify volumes and fees transparently
- **Monthly Reports:** Shared dashboard + PDF summary by 5th of each month

Payment Terms

- **Revenue Share:** Paid monthly in USDC (stablecoin, Base network)
- **Minimum Payout:** \$50 (accumulates if below threshold)
- **Token Allocation:** Vested linearly over 12 months starting at TGE (Q2 2026)
- **Payment Wallet:** ENB provides Base address for automated payouts

Partnership Agreement

- **Term:** 90 days initial (pilot), renewable quarterly
 - **Exclusivity:** Non-exclusive (DecaFlow can work with other promoters, ENB can work with other Base projects)
 - **Termination:** Either party can exit with 30 days notice
 - **IP Rights:** Both parties retain their own IP, co-created content jointly owned
-

Next Steps

Immediate Actions (This Week)

1. **ENB Reviews Proposal** - feedback on structure, terms, expectations
2. **DecaFlow Prepares Assets** - logos, brand guidelines, one-pagers
3. **Kickoff Call** - align on goals, timeline, responsibilities
4. **Sign Partnership Agreement** - simple MOU or contract (can be informal pilot agreement)

Week 1-2 Deliverables

ENB: - Set up referral tracking system - Schedule first Twitter Space - Draft blog post/newsletter feature

DecaFlow: - Create ENB-exclusive quest/challenge - Prepare promotional graphics - Set up analytics dashboard for ENB

Contact & Communication

Primary Contact: Ofem Mbang (DecaFlow Founder)

hello@affidexlab.com

Telegram: t.me/decaflowprotocol

Twitter: @DecaFlow

Preferred Meeting Times: Flexible, async-friendly (we move fast)

Communication Channels: - Weekly sync calls (15-30 min) - Slack/Telegram group for day-to-day coordination - Monthly performance reviews

Appendix: DecaFlow Quick Facts

Live Product: <https://decaflow.xyz>

Documentation: <https://docs.decaflow.xyz>

Twitter: @DecaFlow

Telegram: t.me/decaflowprotocol

Key Metrics (As of Dec 28, 2025): - Chains Supported: 6 (Base, Arbitrum, Optimism, Polygon, Ethereum, Avalanche) - Contracts Deployed: (audited infrastructure) - Privacy Integration: CoW Protocol - Cross-Chain: Chainlink CCIP + Circle CCTP - Staking: VDM time-locked staking live - Gamification: Pioneer 100, Quests, Leaderboard

Team: - Affidex Lab (1 year old incubation lab) - Core team: Founder, Lead Dev, UI/UX Designer - Partnerships: Base, Chainlink, Circle, CoW Protocol

Security: - Built on battle-tested infrastructure (Chainlink, Circle) - Smart contracts based on audited protocols - Formal audits scheduled Q1 2026 (CertiK/Tail of Bits)

Competitive Moat: - Only full-stack privacy DEX on Base - First to combine CoW + DLMM + Cross-Chain - Base-native from day one (not multi-chain afterthought)

Closing Thoughts

This partnership represents a **rare opportunity** for both organizations:

For ENB: Get in early on a Base-native protocol with institutional-grade infrastructure, real traction, and a clear path to scale. Revenue share + tokens = upside without cash risk.

For DecaFlow: Partner with the leading Base ecosystem growth platform to unlock visibility, credibility, and user acquisition that would cost 6-7 figures if purchased directly.

The Alignment is Perfect: - ENB promotes Base projects → DecaFlow is Base-native - ENB audience = DeFi users → DecaFlow target market - ENB needs portfolio wins → DecaFlow has real product + traction - DecaFlow needs marketing → ENB has expertise + reach

We're not asking for free work. We're proposing a **performance-based partnership** where ENB shares in DecaFlow's success through revenue + tokens. If we don't grow, ENB doesn't lose. If we scale, ENB scales with us.

Let's build something great on Base together.

Ready to move forward? Let's schedule our next call to finalize details.
