

DECAFLOW

Private Liquidity Layer for Arbitrum &
Beyond

Seed Round: \$500K - \$2M

Valuation: \$4M - \$8M pre-money

□ The Problem

DeFi's \$1B+ Privacy Crisis

Every trade is public, front-runnable, and exploitable

\$1B+

Extracted annually through MEV

70%+

Users on multiple chains

- **\$1B+ extracted annually** through MEV (sandwich attacks, front-running)
- **Whales can't move size** without severe market impact and predatory bots
- **70%+ of users** hold assets across multiple chains (fragmented liquidity)
- **Institutions won't adopt** DeFi without transaction privacy

The Market is Demanding Privacy

- Privacy-focused protocols grew 180% in 2024
- Institutional DeFi adoption accelerating (BlackRock, Fidelity entering)
- Arbitrum ecosystem: \$2.5B TVL, fastest-growing L2 for DeFi
- Privacy is becoming a **requirement**, not a feature

□ The Solution: DecaFlow

Arbitrum-Native Privacy Infrastructure Layer

We combine **3 breakthrough technologies**:

1. Privacy Flow Engine (CoW Protocol)

- Batch auctions hide trade intent
- Zero MEV through dark orderflow
- No gas until settlement

2. DLMM Liquidity Pools

- 3-5x better capital efficiency than traditional AMMs
- Dynamic fee adjustment based on volatility
- Programmable liquidity strategies

3. AI-Powered MEV Protection

- Real-time MEV risk scoring
- Predictive front-run detection
- Automated privacy routing

Trade Privately. Move Quietly. Earn Densely.

□ What's Live Today

Launched December 20, 2025 (3 weeks ago)

□ Multi-Chain Swap Aggregator

- Live on 6 chains: Ethereum, Arbitrum, Base, Optimism, Polygon, Avalanche
- Best-price routing via 0x + CoW Protocol
- Privacy mode with MEV protection

□ DLMM Pools

- Programmable liquidity pools deployed
- Dynamic fee mechanisms active
- LP incentive system live

□ Cross-Chain Bridging

- CCIP (Chainlink) integration
- CCTP (Circle) for native USDC
- Li.Fi aggregator fallback

□ Gamification Layer

- Pioneer 100 program (2x airdrop for first 100 wallets)
- Points & rewards system
- Weekly prize pools from platform fees

□ Strategic Partnership

- VDM utility token staking program (live)
- 4-16% APY in USDT rewards

Current Traction

Early Stage, Strong Foundation (3 weeks live)

\$293

Uptime since launch

We're Transparent About Where We Are

- ☒ Product is live and functional (de-risked)
- ☒ Tech stack is battle-tested (CoW, Chainlink, Circle)
- ☒ Strong product-market fit hypothesis
- ☐ Still building initial user base
- ☐ Marketing hasn't begun (funds needed)

With proper marketing and liquidity incentives, we're positioned to scale rapidly.

Market Opportunity

\$130B+ Annual DEX Volume

\$130B+ DEX annual volume (2024)	\$8B+ Total Value Locked
45% YoY growth	<5% Privacy DEX penetration

Arbitrum Ecosystem

- \$2.5B TVL (3rd largest L2)
- 600K+ weekly active users
- Home to GMX, Camelot, Trader Joe, Gains Network

Competitive Landscape

Protocol	Privacy	DLMM	Multi-Chain	Arbitrum
DecaFlow	☒	☒	☒	☒
Uniswap	☐	☐	☒	☐
CoW Swap	☒	☐	Limited	☐
TraderJoe	☐	☒	☒	☐

Business Model

3 Revenue Streams (Live)

1. Swap Fees: 0.8%

- Applied to all trades
- Competitive with Uniswap (0.3%) + privacy premium
- 50% recycled into weekly prize pools

2. LP Management Fees: 10%

- 10% of DLMM pool profits
- Performance-based (only when LPs profit)

3. Cross-Chain Fees: 0.1%

- Premium on CCIP/CCTP transactions

Revenue Distribution

- **50%** → \$DECA stakers (protocol revenue share)
- **30%** → Liquidity providers (LP incentives)
- **20%** → Treasury (development & operations)

Conservative Projections

Timeline	TVL	Monthly Volume	Monthly Revenue
6 months	\$5M	\$2M	\$16K
12 months	\$25M	\$15M	\$120K
24 months	\$100M	\$75M	\$600K

□ Tokenomics: \$DECA

Total Supply: 1,000,000,000 DECA

Token Generation Event: Q2 2026 | Chain: Arbitrum

Allocation	Amount	%	Vesting
Community & Airdrops	300M	30%	Linear 48mo
Team & Advisors	200M	20%	12mo cliff, 36mo linear
Seed Investors	150M	15%	6mo cliff, 24mo linear
Treasury & DAO	150M	15%	DAO-governed
Liquidity	100M	10%	TGE unlock
Partners	100M	10%	6mo cliff, 24mo linear

Token Utility

- **Staking:** Earn 50% of protocol revenue in USDC (15-30% APY target)
- **Fee Discounts:** Up to 100% fee waiver for top stakers
- **Governance:** Vote on protocol upgrades, fees, treasury
- **Liquidity Mining:** Earn boosted rewards
- **MEV Refunds:** Stakers receive MEV captured by protocol

Real yield from protocol fees. Deflationary (10% buyback & burn).

Q1 2026 (Next 3 Months)

- Security audits (CertiK + Trail of Bits scheduled)
- \$500K marketing campaign
- 3-5 strategic partnerships
- Scale to \$5M TVL, 500 active users
- Mobile-optimized UI

Q2 2026 (Months 4-6)

- **\$DECA Token Generation Event**
- DAO governance launch
- CEX listings (2-3 Tier 2 exchanges)
- Liquidity incentives program (\$500K in rewards)
- \$25M TVL target

H2 2026 (Months 7-12)

- Institutional liquidity pools (compliance-ready)
- Advanced MEV analytics dashboard
- Mobile app (iOS/Android)
- Expand to 3 new chains
- \$100M cumulative volume
- **Series A fundraise**

□ Team: Affidex Lab

Building Core DeFi Infrastructure

Affidex Lab is a blockchain incubation lab founded December 2024.

Mission: Build core utility projects through blockchain + AI

Track Record

- 3 projects incubated (DecaFlow is flagship)
- 2 additional projects in development
- **Rapid execution:** Idea → mainnet in 6 months

Leadership

Samuel Ut - Founder & CEO

- Serial blockchain builder
- 1+ year incubation experience
- Deep expertise in DeFi protocols

Core Team

- Lead Smart Contract Engineer
- Frontend Developer
- UI/UX Designer
- Community Manager

Post-Raise Hires

- Head of Business Development
- Senior Smart Contract Engineer (audit-focused)
- Growth Marketing Lead
- DevRel / Technical Writer

□ The Investment

Seeking: \$500K - \$2M Seed Round

Valuation

\$4M - \$8M

pre-money

Token Allocation

15%

150M \$DECA

Investment Terms

- SAFE or Token Warrant
- 6-month cliff, 24-month linear vesting
- Pro-rata rights in future rounds
- Lead investors: Advisory board seat

Use of Funds (18-month runway)

Category	%	Amount
Team expansion & salaries	35%	\$175K - \$700K
Security audits & bug bounties	20%	\$100K - \$400K
Marketing & user acquisition	20%	\$100K - \$400K
Liquidity incentives & rewards	15%	\$75K - \$300K
Infrastructure & tools	7%	\$35K - \$140K
Legal & compliance	3%	\$15K - \$60K

□ Why Invest in DecaFlow?

1. MASSIVE MARKET TAILWINDS

DEX volume +45% YoY, privacy is the next frontier, institutions entering DeFi

2. PRODUCT IS LIVE (De-Risked)

Not a whitepaper — real users, real revenue, 100% uptime, zero security incidents

3. DEFENSIBLE MOAT

Only privacy + DLMM + Arbitrum-native protocol. High technical barriers to entry.

4. CLEAR PATH TO REVENUE

3 active revenue streams, sustainable model, conservative projections show profitability by month 18

5. PROVEN EXECUTION

Shipped mainnet product in 6 months, zero security incidents, strong technical foundation

6. PERFECT TIMING

Privacy regulation clarifying, institutions demanding solutions, Arbitrum at inflection point

-
- First-mover advantage in \$130B+ market
 - Battle-tested tech stack (CoW, Chainlink, Circle)
 - Network effects from liquidity & user base
 - Strategic partnerships securing distribution

□ Contact & Next Steps

Let's Build the Future of Private DeFi

Samuel Ut

Founder & CEO, Affidex Lab

□ hello@affidexlab.com

□ https://decaflow.xyz

□ t.me/decaflowprotocol

🐦 @DecaFlow | @affidexlab

Next Steps

1. Schedule deep-dive call (product demo + Q&A)
2. Technical review with your team
3. Discuss terms & timeline
4. Target close: 4-6 weeks

DecaFlow Protocol

Arbitrum-Native Privacy Infrastructure

- ☐ Live on mainnet
- 🔒 Zero security incidents
- 💰 Real revenue from day 1
- 📈 Positioned for rapid scale

**"Trade Privately. Move Quietly. Earn
Densely."**

Thank you.
