White Paper Companion Document | December 2025

Investment Opportunity

Seeking: \$500K - \$2M Seed Round
Valuation: \$4M - \$8M pre-money
Security: SAFE or Token Purchase Agreement
Use: Audits, team expansion, growth to \$50M TVL

What is DecaFlow?

Privacy-first cross-chain DEX built on Base L2

DecaFlow solves DeFi's biggest problems:

- **MEV Protection:** CoW Protocol eliminates \$1B+ annual sandwich attacks
- **Capital Efficiency:** DLMM pools deliver 3-5x better LP yields
- **Secure Bridging:** Chainlink CCIP + Circle CCTP across 6 chains
- **Base Native:** Leveraging Coinbase's institutional infrastructure

Status: Live on mainnet since December 20, 2025 (not vaporware)

Market Opportunity

Metric	Value
DEX Annual Volume	\$130B+
Annual MEV Extraction	\$1B+ (our TAM)
DEX TVL	\$8B+
YoY Growth	45%

Gap: No viable privacy DEX exists on Base, Arbitrum, or major L2s

Timing: Institutions demand privacy (can't show positions publicly)

Traction (6 Months Post-Launch)

Mainnet live (Base + 5 other chains)
Privacy swaps operational (CoW Protocol)
DLMM pools deployed
