

Partnership Proposal

DecaFlow Protocol × 4K Token

Confidential - For Discussion Purposes

Executive Summary

DecaFlow Protocol proposes a strategic partnership with 4K to pioneer **privacy-enabled memecoin trading** across multiple chains. This collaboration will make \$4K the first memecoin with native privacy features while driving substantial liquidity and volume to both ecosystems.

Key Benefits: - **For 4K:** 30% revenue share, cross-chain utility, first-mover privacy advantage, expanded holder base - **For DecaFlow:** Deep liquidity pool, marquee memecoin partnership, proven community traction

About the Parties

DecaFlow Protocol

Privacy-focused cross-chain DEX built on Base, powered by Chainlink CCIP. DecaFlow enables users to swap assets across multiple chains with enhanced privacy features, setting a new standard for confidential DeFi.

Live Platform: <https://decaflow.tech>

Network: Base (with CCIP bridges to Ethereum, Arbitrum, Polygon, and more)

Focus: Privacy + Cross-chain interoperability

4K Token

High-momentum memecoin with strong community engagement and viral growth potential.

Social: https://x.com/4K_token

Community: Active and growing holder base

Positioning: Prime candidate for utility expansion beyond speculation

Partnership Vision

Make \$4K the first memecoin with native privacy superpowers.

By integrating 4K as a featured asset on DecaFlow, we transform 4K from a pure memecoin into a utility token with: - Privacy-enabled swaps - Cross-chain bridging capabilities - Revenue-generating mechanisms for holders - Competitive trading incentives

Technical Implementation

Phase 1: Base Integration (Weeks 1-2)

- Launch featured 4K trading pairs on DecaFlow
- Enable privacy swaps for 4K/ETH, 4K/USDC
- Dedicated UI section: "4K Privacy Trading"
- Real-time analytics dashboard for 4K volume

Phase 2: Cross-Chain Bridges (Weeks 3-4)

Powered by **Chainlink CCIP**, 4K becomes available on: - **Ethereum Mainnet** → Tap into ETH's liquidity - **Arbitrum** → Low-cost, high-speed trading - **Polygon** → Massive user base access

Each bridge maintains privacy features and seamless UX.

Phase 3: Advanced Features (Weeks 5-6)

- **4K Staking Vault:** Stake 4K, earn swap fees
- **Privacy Mixer:** Enhanced anonymity for large 4K holders
- **Limit Orders:** Professional trading tools for 4K pairs

Revenue Model & Economics

Revenue Sharing Structure

Total Swap Fees: 0.3% per trade (industry standard)

Distribution: - **30% to 4K** → Shared with 4K team/treasury/community - **70% to DecaFlow** → Protocol operations, liquidity rewards, development

Projected Volume & Revenue (Conservative)

Month	Projected 4K Volume	Total Fees (0.3%)	4K Share (30%)	DecaFlow Share (70%)
Month 1	\$500,000	\$1,500	\$450	\$1,050
Month 3	\$2,000,000	\$6,000	\$1,800	\$4,200
Month 6	\$5,000,000	\$15,000	\$4,500	\$10,500

Note: Volumes based on typical memecoin DEX activity. Aggressive marketing could 10x these numbers.

Liquidity Incentives for DecaFlow

4K commits to providing: - Initial liquidity pool: \$50,000-\$100,000 in 4K/ETH pair - Ongoing liquidity mining incentives (4K rewards for LPs) - Marketing budget co-allocation

DecaFlow commits to providing: - Matching liquidity incentives in native tokens - Prominent platform placement - Technical integration and maintenance

Marketing & Community Engagement

Co-Hosted Trading Competitions

Monthly 4K Trading Derby: - Prize Pool: \$5,000 in 4K + DecaFlow rewards - Top 10 traders by volume win - Privacy mode bonus: +20% rewards for privacy-enabled swaps - Duration: 7 days per competition

Launch Campaign: - Joint Twitter Spaces AMA - Cross-promotion across both communities - "Privacy Memecoin" narrative push - Influencer partnerships (split costs 50/50)

Shared Marketing Deliverables

- Co-branded announcement thread
 - Tutorial videos: "How to Swap 4K Privately"
 - Meme content factory (4K community loves memes)
 - PR outreach: "First Privacy-Enabled Memecoin"
-

Benefits Breakdown

For 4K Token

Revenue Stream: 30% of all 4K swap fees → passive income from day 1

Cross-Chain Expansion: Reach ETH, Arbitrum, Polygon communities

First-Mover Advantage: "The Privacy Memecoin" positioning

Increased Utility: Beyond speculation → real DeFi use case

Volume Growth: Trading competitions + new user acquisition

No Token Required: No need to issue new tokens or dilute supply

Enhanced Credibility: Partnership with privacy-focused protocol

For DecaFlow

Deep Liquidity: \$50K-\$100K initial pool + ongoing incentives

User Acquisition: Tap into 4K's active community

Volume Driver: Memecoin traders = high frequency transactions

Narrative Leader: First privacy DEX with major memecoin partner

Cross-Chain Traffic: 4K holders bridging = CCIP volume

Revenue Growth: 70% of high-volume 4K trading fees

Marketing Amplification: Joint campaigns with established community

Milestones & Timeline

Week 1-2: Foundation

- ☐ Legal agreements signed
- ☐ 4K smart contract integration on Base
- ☐ Initial liquidity pools deployed
- ☐ Testing and security audit

Week 3-4: Launch

- ☐ Public announcement (coordinated)
- ☐ 4K privacy trading goes live
- ☐ First trading competition launches
- ☐ Cross-chain bridges activated

Week 5-6: Scale

- ☐ Advanced features deployed (staking, mixer)
- ☐ Marketing campaign in full swing
- ☐ Volume milestones tracked
- ☐ Partnership performance review

Month 3: Expansion

- ☐ Additional chain integrations (if demand warrants)
- ☐ New feature proposals from community
- ☐ Revenue sharing reports published

Terms & Commitments

4K Commits To:

1. Provide \$50,000-\$100,000 initial liquidity (4K/ETH pair)
2. Maintain liquidity for minimum 6 months
3. Co-market the partnership to 4K community
4. Participate in monthly trading competitions (prize allocation)
5. Provide brand assets and support for integration

DecaFlow Commits To:

1. Integrate 4K as featured asset within 2 weeks
2. Deploy cross-chain bridges via Chainlink CCIP
3. Distribute 30% of 4K swap fees to 4K treasury
4. Provide prominent UI placement and branding
5. Match liquidity incentives and marketing budget
6. Deliver transparent monthly reporting

Revenue Distribution

- Fees calculated daily, distributed monthly
- Transparent on-chain accounting
- Either party can audit at any time

Partnership Duration

- Initial term: 12 months
 - Auto-renews unless either party provides 60-day notice
 - Performance review at 3-month and 6-month marks
-

Risk Mitigation

Smart Contract Security:

All integrations audited by DecaFlow's security team. 4K contract review completed pre-launch.

Liquidity Risks:

Both parties commit to maintaining minimum liquidity thresholds. Exit penalties for early withdrawal.

Market Volatility:

Revenue sharing based on fees (not token price), ensuring stability regardless of market conditions.

Regulatory:

Privacy features fully compliant with current DeFi standards. No KYC required maintains decentralization ethos.

Success Metrics

3-Month Goals

- \$5M+ cumulative 4K trading volume
- 1,000+ unique 4K traders on DecaFlow
- \$10,000+ in shared revenue generated
- 3 successful trading competitions completed

6-Month Goals

- \$20M+ cumulative volume
 - 5,000+ unique traders
 - \$50,000+ in shared revenue
 - Top 3 memecoin by DEX privacy volume
-

Next Steps

1. **Review & Feedback:** 4K reviews this proposal and provides input
 2. **Terms Negotiation:** Finalize revenue split, liquidity amounts, timeline
 3. **Legal Documentation:** Draft formal partnership agreement
 4. **Technical Kickoff:** Smart contract integration begins
 5. **Launch Planning:** Coordinate marketing and announcement strategy
