

DecaFlow

Private Liquidity Layer
for Base & Beyond

Privacy Swaps • DLMM Liquidity • Cross-Chain Native

Seed Round Pitch Deck
December 2025
Seeking \$500K - \$2M

The Problem

DeFi lacks privacy by design. Every trade is transparent, exploitable, and tracked.

- **MEV Extraction:** \$1B+ extracted from traders annually through front-running and sandwich attacks
- **Privacy Crisis:** All transactions are public—whales can't move without market impact
- **Fragmented Liquidity:** Cross-chain swaps require multiple bridges, exposing users to exploits
- **Trust Barriers:** Institutions won't adopt DeFi without transaction privacy

Current DEXs optimize for speed and liquidity, but [privacy and security](#) are afterthoughts.

The Solution

DecaFlow is a **privacy-first liquidity layer** that combines confidential routing with programmable DLMM pools.

Privacy Flow Engine

CoW Protocol routing hides trade intent through batch auctions and dark orderflow, eliminating MEV exploitation

DLMM Liquidity

Dynamic Liquidity Market Maker pools capture denser fees and provide capital-efficient liquidity provisioning

Secure Cross-Chain

Chainlink CCIP & Circle CCTP integration for trust-minimized bridging across 6+ chains

Base Native

Built on Coinbase's Base L2—low fees, fast settlements, institutional-grade infrastructure

"Trade privately. Move size quietly. Earn dense fees."

How It Works

Privacy Flow Engine

- User submits trade intent (not public transaction)
- CoW Protocol batches intents into dark auctions
- Solvers compete to find best execution
- Settlement happens on-chain—zero front-running
- Optional privacy quests for enhanced anonymity

DLMM Pools

- Liquidity concentrated in active price bins
- LPs earn higher fees per dollar deployed
- Auto-rebalancing based on volatility
- Lower slippage for large trades

Cross-Chain Security

- CCIP for general message passing & token transfers
- CCTP for native USDC swaps (no wrapped tokens)
- Unified UX across Base, Arbitrum, Optimism, Polygon, Ethereum, Avalanche

Market Opportunity

\$130B+

DEX Annual Volume (2024)

\$8B+

Total Value Locked in DEXs

45%

YoY Growth in DEX Trading

\$1B+

Annual MEV Extraction

Why Privacy DEXs Now?

- **Institutional Demand:** Funds need private execution to avoid front-running
- **Regulatory Clarity:** Privacy ≠ anonymity; compliant privacy is the future
- **Base Momentum:** \$2B+ TVL, fastest-growing L2, backed by Coinbase
- **Cross-Chain Era:** 70%+ of DeFi users hold assets on multiple chains

Traction & Roadmap

LAUNCHED: December 20, 2025

☐ Achieved (Q4 2025)

- Mainnet launch on Base
- Privacy swap integration (CoW Protocol)
- DLMM pools deployed
- Cross-chain bridging (CCIP + CCTP)
- Multi-chain support (6 chains)
- Points & rewards system live
- Pioneer 100 program (2x airdrop)
- VDM staking mechanism
- Leaderboard & quests platform

☐ Next 6-12 Months

- **Q1 2026:** Security audits (CertiK/Trail of Bits)
- **Q1 2026:** Strategic partnerships (wallets, protocols)
- **Q1 2026:** \$10M TVL target
- **Q2 2026:** Native token (\$DECA) TGE
- **Q2 2026:** DAO governance launch
- **Q2 2026:** Mobile app (iOS/Android)
- **H2 2026:** Institutional liquidity pools
- **H2 2026:** \$100M+ cumulative volume

First 100 wallets get 2x airdrop allocation + permanent Founding Trader status

Tokenomics: \$DECA

Total Supply: 1,000,000,000 DECA

TGE: Q2 2026

Chain: Arbitrum

Allocation	Amount	%	Vesting
Community & Airdrops	300M	30%	Linear over 48 months
Team & Advisors	200M	20%	12-month cliff, 36-month linear
Seed Investors	150M	15%	6-month cliff, 24-month linear
Treasury & DAO	150M	15%	Unlocked, DAO-governed
Liquidity Provisions	100M	10%	Unlocked at TGE
Partners & Ambassadors	100M	10%	6-month cliff, 24-month linear

Token Utility

- **Staking:** Stake \$DECA to earn USDC from protocol fees (15-30% APY)
- **Fee Discounts:** Tiered system—up to 100% fee waiver for top stakers
- **Governance:** Vote on protocol upgrades, fee structures, treasury allocation
- **Liquidity Mining:** Earn \$DECA rewards for providing DLMM liquidity

Business Model

Revenue Streams

- **Swap Fees:** 0.3% per trade (industry standard, competitive with Uniswap)
- **Cross-Chain Fees:** 0.1% premium on CCIP/CCTP transactions
- **Privacy Premium:** Optional 0.05% for enhanced privacy routing
- **LP Management Fees:** 10% of DLMM pool profits (shared with protocol)

Financial Projections (Conservative)

Metric	6 Months	12 Months	24 Months
Total Value Locked	\$10M	\$50M	\$200M
Monthly Volume	\$5M	\$25M	\$100M
Monthly Revenue	\$15K	\$75K	\$300K
Active Users	1,000	10,000	50,000

Go-to-Market Strategy

Phase 1: Community Building (Now - Q1 2026)

- Pioneer 100 incentive program
- Points & quest gamification
- Weekly trading competitions
- Base ecosystem partnerships
- KOL/influencer campaigns
- Twitter Spaces & AMAs
- Discord community growth

Phase 2: Strategic Growth (Q2-Q3 2026)

- Wallet integrations (Rainbow, Frame, Coinbase Wallet)
- DeFi protocol partnerships
- Aggregator listings (1inch, 0x)
- Security audits & certifications
- \$DECA token launch (TGE)
- Liquidity mining campaigns

Phase 3: Institutional Adoption (Q4 2026+)

- Whitelabel privacy solutions for institutions
- API access for trading desks
- Compliance-friendly privacy features
- Cross-chain expansion (10+ chains)
- Mobile app launch
- Governance DAO activation

Distribution Channels

- Direct (decaflow.xyz)
- Aggregators (1inch, Matcha)
- Embedded (wallet integrations)
- API (institutional partners)
- Mobile apps (iOS/Android)

Competitive Landscape

Protocol	Privacy	Cross-Chain	DLMM	Base Native	MEV Protection
DecaFlow	✓ CoW Protocol	✓ CCIP + CCTP	✓ Yes	✓ Yes	✓ Full
Uniswap	✗	✗	✗	✗	✗
Railgun	✓	Partial	✗	✗	Partial
Aztec Network	✓ zk-proofs	✗	✗	✗	✓
CoW Swap	✓	✗	✗	✗	✓
1inch	✗	✓	✗	Partial	Partial

Our Competitive Advantages

▣ Full-Stack Privacy

Only DEX combining CoW batch auctions + DLMM pools + cross-chain on Base

▣ Base Ecosystem

Native to fastest-growing L2, backed by Coinbase—institutional credibility

▣ Capital Efficiency

DLMM provides 3-5x better capital efficiency than traditional AMMs

▣ Trust-Minimized

Chainlink CCIP (bank-grade security) + Circle CCTP (native USDC)

Technology Stack

Core Infrastructure

- **Base L2:** Primary deployment (Optimism-based, EVM-compatible)
- **Solidity:** Smart contracts (audited, open-source)
- **CoW Protocol:** Intent-based privacy routing
- **DLMM Pools:** Meteora/TraderJoe architecture
- **Chainlink CCIP:** Cross-chain messaging & token transfers
- **Circle Cctp:** Native USDC bridging

Frontend & UX

- React + TypeScript
- RainbowKit wallet integration
- Wagmi hooks for blockchain interaction
- Real-time WebSocket updates

Security & Compliance

- Smart contract audits: CertiK, Trail of Bits (scheduled Q1 2026)
- Bug bounty: \$100K-\$500K for critical vulnerabilities
- Multisig treasury (Gnosis Safe)
- 2-day governance timelock
- Emergency pause mechanism
- KYC for institutional features (optional)

Backend Services

- Node.js + Express API
- PostgreSQL for user data & points
- Redis for caching & real-time stats
- Deployed on Render/Railway

All core contracts are open-source and will be fully audited before mainnet scaling

Team

Built by Affidex Lab

Incubation lab founded 1 year ago, focused on building core utility projects that solve real-world problems through blockchain and AI. DecaFlow is our flagship DeFi product.

Incubation Expertise

Track record of building and shipping 3 blockchain/AI projects from 0 to 1

Rapid Execution

DecaFlow: Idea to mainnet launch in under 6 months with full feature set

Technical Depth

Deep expertise in DeFi primitives, cross-chain architecture, privacy protocols

Community-First

No VC pre-allocation. Bootstrapped to launch. Community owns majority of tokens.

Key Roles & Hiring

- **Current Team:** Founder/CEO, Lead Developer, UI/UX Designer, Community Manager
- **Post-Raise Hires:** Head of BD, Senior Smart Contract Engineer, Security Auditor, Growth Marketing Lead

Founded by Samuel Ut — Serial builder with 1+ year in blockchain incubation

Use of Funds

\$500K - \$2M

Seed Round | 12-18 Month Runway

Category	Allocation	Purpose
Team & Hiring	25%	4 key hires (BD, Dev, Security, Marketing) + salaries
Security & Audits	20%	CertiK/Trail of Bits audits, bug bounty program, ongoing security
Marketing & Growth	30%	KOL campaigns, events, community rewards, partnerships
Liquidity Incentives	15%	LP rewards, trading competitions, airdrop allocations
Infrastructure & Tools	7%	Cloud hosting, APIs (Chainlink, etc.), dev tools, analytics
Legal & Compliance	3%	Corporate structure, token legal review, regulatory counsel

Key Milestones to Series A

- \$50M+ Total Value Locked across all chains
- \$100M+ cumulative trading volume
- 10,000+ active monthly users
- 5+ strategic partnerships (wallets, protocols, aggregators)
- Successful \$DECA token launch with DAO governance
- 2 completed security audits with zero critical findings
- \$500K+ annualized revenue run rate

Why Invest Now?

Massive Tailwinds

DEX volume up 45% YoY. Privacy is the next frontier. Base is the fastest-growing L2.

Defensible Moat

First-mover in privacy + DLMM + Base. Complex tech stack = high barrier to entry.

Proven Execution

Shipped production protocol in 6 months. Live on mainnet with paying users.

Clear Path to Revenue

3+ revenue streams (swap fees, cross-chain fees, LP premiums). Sustainable from day 1.

Unique Advantages

- Only full-stack privacy DEX on Base
- Coinbase ecosystem = institutional credibility
- Battle-tested infrastructure (Chainlink CCIP, CoW, Circle CCTP)
- Community-first tokenomics (30% to users)
- Already live and operational

Market Timing

- Privacy regulation clarifying globally
- Institutional DeFi adoption accelerating
- Base surpassing \$2B TVL in 2024
- MEV awareness at all-time high
- Cross-chain DeFi becoming standard

"Privacy in DeFi is inevitable. The question isn't IF, but WHO will build it. We're already live."

The Ask

To Series A

Token Allocation

15%

Seed Investors (150M \$DECA)

What You Get

- **Equity:** Ownership in Affidex Lab (parent company)
- **Token Rights:** 15% allocation of \$DECA (150M tokens) with 6-month cliff, 24-month vesting
- **Strategic Input:** Quarterly updates, advisory board seat for lead investors
- **Network Access:** Introductions to DeFi protocols, L2 ecosystems, institutional users
- **First Right of Refusal:** Participation in Series A (if applicable)

Target Close: Q1 2026 | Rolling basis accepted
