

DecaFlow Partnership Outreach — 24 Dec 2025

iZUMi Finance

- Official account: `@izumi\_Finance`
- Key contact: Jimmy Yin (`@0xJimmyYin`) – co-founder (Link3 team page)

****DM to @izumi_Finance****

>

> GM iZUMi crew! I'm Anieno from DecaFlow, the Base-native swap hub that runs six chains, privacy swaps, and a cash-backed leaderboard (0.8% of fees go to weekly prizes). We just ripped out Maverick V2 and routed all DLMM orderflow through iZiSwap so every Base user hitting DecaFlow now lands on your books. I'd love to sync on a co-marketing sprint: spotlight iZi pools inside our leaderboard, push a "DLMM mastery" quest, and double our 7x liquidity points on your target pairs. Can we line up a 20-min call this week to map incentives + joint threads?

****DM to @0xJimmyYin****

>

> Hi Jimmy—Anieno from DecaFlow here. I know you're scaling iZiSwap globally; on Base we've already migrated our smart order router (0x, CoW, Aerodrome, etc.) to your DLMM and are tracking depth so we can showcase Izumi performance publicly. My goal is to run a Base-focused liquidity sprint where we guarantee net-new TVL from our Pioneer leaderboard (cash payouts + 2026 airdrop) in exchange for co-announcements and maybe a custom Izumi badge. Is this interesting? Happy to share current volume plus the product deck if you have a slot this week.

Pyth Network

- Official account: `@PythNetwork`
- Key contacts: Marc Tillement (`@KemarTiti`) and Izzy Howell (`@0xisabelle`) – ecosystem & growth leads (Pyth Data Association team page)

****DM to @PythNetwork****

>

> Hey Pyth team—DecaFlow is the Base-native swap/bridge that gamifies flow (points, cash rewards, upcoming 2026 token drop) across six chains. Ferra's run on Sui showed how much credibility your feeds add; we want to wire Pyth price feeds into our risk controls (bridge slippage guardrails + privacy swap sanity checks) before we scale Base incentives. Could we explore a fast-track integration plus ecosystem amplification (listing on your integrations page, joint quest, maybe a co-authored blog)? Let me know the best BD contact for Base and I'll send technical notes + dashboards.

****DM to @KemarTiti****

>

> Hi Marc—Anieno from DecaFlow here. We're Base-first but already route six chains, run a public leaderboard, and pay weekly cash rewards from our 0.8% fee stream. I'd love to collaborate on a "Pyth-protected swaps" narrative: integrate your ETH/USDC feeds into our router, publish the before/after safeguards, and route our Pioneer 100 quest through your channels so builders see real usage. Could you spare 15 minutes to advise on integration scope + potential grant alignment?

****DM to @Oxisabelle****

>

> Hi Izzy! We're rolling out DecaFlow's Base campaign (six-chain swaps + privacy routing + Pioneer leaderboard) and want to anchor it on reliable price data. A Pyth integration would let us market "verified execution" to the same audience that loved Ferra's launch. Would you be open to co-designing a growth moment—think joint quest, metrics thread, and spotlighting how Pyth feeds gate our cash reward system? Happy to ship a concise brief if you have time.

Moonwell

- Official account: `@MoonwellDeFi`

- Key contact: Luke Youngblood (`@lukeyoungblood`) – founder (RootData profile)

****DM to @MoonwellDeFi****

>

> GM Moonwell fam! DecaFlow is the Base aggregation layer with points, cash rewards, privacy swaps, and quests. Our users keep asking where to park the assets they bridge in, so we'd like to ship a "Swap → Supply on Moonwell" one-click flow plus a leaderboard quest that rewards WELL/AERO suppliers. Are you open to co-hosting an activation (DecaFlow double points + Moonwell vault boost) and shouting it out to your community? I can share mockups, user numbers, and the payout math as soon as you're free.

****DM to @lukeyoungblood****

>

> Hey Luke—Anieno from DecaFlow. We just relaunched our Base router (six chains, privacy swaps, Pioneer leaderboard) and want to funnel that flow directly into Moonwell so new users land in your cbBTC/USDC markets. Thinking: we open-source a deposit widget, track referrals via our points API, and run a joint quest where Moonwell suppliers complete their first lend from DecaFlow to earn cash rewards + your XP. Does this align with your UX push on Base? Would love to swap notes this week.
