1. @hidreams__ (Hi Dreams)

Profile: Growth Strategist, Degen community leader (@syndicateio marketer), 7.2K followers

Telegram: t.me/degennoobs

Focus: Shitposting, community growth, degen trading

DM:

Hey Hi Dreams!

Saw your growth strategy work and the Degen Noobs community you're building. Your "WICKED GROWTH STRATEGIST" tag got my attention 😊

I'm Samuel, founder of @DecaFlow, and I think we have a partnership opportunity that could bring MASSIVE value to your Telegram community while creating a recurring revenue stream for you.

QUICK CONTEXT:

DecaFlow is the first privacy-focused cross-chain DEX on Base. We solve a problem EVERY degen trader faces:

When your community members ape into trades on Uniswap or other DEXs: • Bots front-run their entries • Other degens copy their moves • Their wallets get tracked • Their plays become public • Zero financial privacy

DecaFlow = PRIVATE swaps + cross-chain bridges (Base, ETH, Arbitrum, Polygon, Optimism, Avalanche) in ONE platform.

HERE'S THE PARTNERSHIP:

I know you're focused on bringing VALUE to your degens, not just promoting random projects. So here's how this benefits EVERYONE:

1. EXCLUSIVE BENEFITS FOR DEGEN NOOBS

Your Telegram members get: • VIP trading fees (0.2% instead of 0.3% = 33% discount) • Telegram bot access (swap without leaving the chat!) • Priority customer support • Early access to new features • Educational content about privacy trading • Monthly trading competitions with prizes

This makes YOU look like the hero who brought them premium tools.

2. RECURRING REVENUE FOR YOU 💰

Full transparency: We're early-stage with no marketing budget for upfront payments.

BUT here's what we CAN do: • You get 30% of ALL swap fees from your community members (FOREVER) • Tracked via custom referral link/code • Paid monthly in USDC (real money, not promises) • Completely passive—once they use it, you earn every time they trade • Unlimited upside: the more they trade, the more you earn

Example Math: - Your community does \$500K monthly volume = \$1,500 in fees → \$450-600 to YOU - \$1M monthly volume = \$3,000 in fees → \$900-1,200 to YOU - \$5M monthly volume = \$15,000 in fees → \$4,500-6,000 to YOU

PLUS Volume Bonuses: - Community hits \$500K = \$500 bonus - Community hits \$1M = \$1,000 bonus - Community hits \$5M = \$5,000 bonus

3. CO-BRANDED PARTNERSHIP

Option A: Standard Integration • Feature DecaFlow in Degen Noobs with your referral link • Co-branded educational content • Joint AMAs/workshops

Option B: White-Label (If you want to go deeper) • Custom DecaFlow interface branded with YOUR logo/colors • "Degen Noobs Trading Hub powered by DecaFlow" • Looks like YOU built it, we handle the tech • Strengthens your brand as a growth strategist who provides tools

4. FUTURE TOKEN ALLOCATION

When we launch our token: • Your community gets priority allocation • You get personal founder allocation • Ground floor opportunity before public launch

WHY THIS MAKES SENSE FOR DEGEN NOOBS:

As a growth strategist and Syndicate marketer, you know the importance of PRIVACY for degen plays:

Your degens protect their strategies (no copycats) Whales in your community can ape without revealing positions No MEV bots front-running their entries Cross-chain access = more degen opportunities Telegram bot = trade without leaving the group chat

This isn't just another "shill this project" ask. This is a TOOL that actually helps your degens trade better and safer while generating passive income for you.

WHAT I'M PROPOSING:

Phase 1: Test with Your Inner Circle • Introduce DecaFlow to your core members first • Get their feedback • See if they find it valuable • Zero pressure, just testing

Phase 2: Full Community Launch • If your inner circle loves it, roll out to full community • Co-branded announcement • Educational session about privacy trading • Launch with exclusive benefits for Degen Noobs

Phase 3: Scale Together • Track volume and earnings • Monthly payouts to you • Optimize based on community feedback • Build long-term partnership

WHY I'M REACHING OUT TO YOU:

You're not just another "crypto influencer." You're: • A GROWTH STRATEGIST (you understand value creation) • Building a REAL COMMUNITY (Degen Noobs on Telegram) • Focused on REAL PLAYS, not just shilling • Connected to Syndicate (you understand ecosystems) • Nigerian (me too!)

You care about your community's success. DecaFlow is a tool that actually helps them succeed while generating passive income for you.

THE ASK:

Would you be open to a 15-20 min call this week to explore this?

I can show you: • How the platform works • How the tracking/revenue sharing works • How we'd roll this out to Degen Noobs • Custom features we could build for your group

If it's a fit, great. If not, no hard feelings. I respect what you're building either way.

WHY THIS MAKES SENSE FOR YOUR COMMUNITY:

As someone who's been in crypto since 2017 and holds a "Ph.D in shitpost," you know the importance of PRIVACY and EDUCATION:

4. EDUCATIONAL INTEGRATION

As a technical analyst and educator, you can integrate DecaFlow into your curriculum:

Module 1: Technical analysis (your current focus) **Module 2:** Privacy trading (DecaFlow integration) **Module 3:** Cross-chain execution (using DecaFlow) **Module 4:** Risk management (privacy = risk management)

5. FUTURE TOKEN ALLOCATION

When we launch our token: • Genesis Academy students get priority allocation
• You get personal founder allocation • Ground floor opportunity before public launch

WHY THIS MAKES SENSE FOR GENESIS ACADEMY:

As a technical analyst and trader, you know the importance of PRIVACY and EXECUTION:

Your students protect their trading strategies (no copycats) They can execute your technical analysis calls WITHOUT being front-run Whales in your academy can trade without revealing positions No MEV bots front-running their entries/exits Cross-chain access = more trading opportunities (teach cross-chain strategies!) Telegram bot = trade without leaving Genesis Academy chat **Strengthens your academy:** Premium tool = premium academy

This isn't just another "shill this project" ask. This is a TOOL that actually helps your students EXECUTE better (which makes YOUR technical analysis more effective!).

WHAT I'M PROPOSING:

Phase 1: Test with Genesis Academy VIPs • Introduce DecaFlow to your core/VIP students first • Get their feedback on execution quality • See if they find it valuable • Zero pressure, just testing

Phase 2: Full Academy Launch • If your VIPs love it, roll out to full academy • Co-branded announcement in Telegram • Educational session: "Privacy Trading 101" • Launch with exclusive benefits for Genesis Academy

Phase 3: Curriculum Integration • Add privacy trading to Genesis Academy curriculum • Track volume and earnings • Monthly payouts to you in USDC • Build long-term partnership

WHY I'M REACHING OUT TO YOU:

You're not just another "crypto influencer." You're: • A TECHNICAL ANALYST (you understand market execution) • A TRADER (you know the pain of front-running) • An EDUCATOR and FOUNDER (Genesis Academy is your baby) • Building a REAL COMMUNITY (26.4K followers + Telegram academy) • Focused on EDUCATION, not just signals

You care about your students' success. DecaFlow is a tool that actually helps them EXECUTE your analysis better (which makes YOU look better as an educator!).

THE ASK:

Would you be open to a 15-20 min call this week to explore this?

I can show you: • How the platform works (technical deep dive) • How the tracking/revenue sharing works • How we'd roll this out to Genesis Academy • How to integrate privacy trading into your curriculum • Custom features we could build for your academy • White-label options for Genesis Academy branding

If it's a fit, great. If not, no hard feelings. I respect what you're building with Genesis Academy.

Focus: Full-time trading, teaching, collabs/PR

DM:

Hey SDX! 👋

Saw your profile—Full-time Trader and "DM 4 Collab & PR." Well, here I am! 😊

I'm Samuel, founder of @DecaFlow, and I think we have a collaboration opportunity that could bring MASSIVE value to your Telegram community while creating a recurring revenue stream for you.

QUICK CONTEXT:

DecaFlow is the first privacy-focused cross-chain DEX on Base. We solve a problem EVERY full-time trader faces (you probably experience this daily):

When you and your community trade on Uniswap or other DEXs: • Bots front-run your trades • Other traders copy your moves • Your wallets get tracked • Your strategies become public • Zero financial privacy

DecaFlow = PRIVATE swaps + cross-chain bridges (Base, ETH, Arbitrum, Polygon, Optimism, Avalanche) in ONE platform.

HERE'S THE COLLABORATION:

I know you're focused on TEACHING and bringing VALUE to your 34.3K community, not just promoting random projects. As a full-time trader, you understand the importance of EXECUTION. Here's how this benefits EVERYONE:

1. EXCLUSIVE BENEFITS FOR YOUR COMMUNITY

Your Telegram members get: • VIP trading fees (0.2% instead of 0.3% = 33% discount) • Telegram bot access (execute trades without leaving your chat!) • Priority customer support • Early access to new features • Educational content

about privacy trading (fits your teaching focus!) • Monthly trading competitions with prizes

This makes YOU look like the full-time trader who brought them premium tools.

2. RECURRING REVENUE FOR YOU 💰

Full transparency: We're early-stage with no marketing budget for upfront PR payments.

BUT here's what we CAN do (and as a full-time trader, you'll appreciate this income stream):

- You get 30% of ALL swap fees from your community members (FOREVER)
- Tracked via custom referral link/code
- Paid monthly in USDC (real money, not promises)
- Completely passive—once they use it, you earn every time they trade
- Unlimited upside: the more they trade, the more you earn

• **This becomes another revenue stream for your full-time trading career**

Example Math (with your 34.3K audience):

- Your community does \$500K monthly volume = \$1,500 in fees → \$450-600 to YOU
- \$1M monthly volume = \$3,000 in fees → \$900-1,200 to YOU
- \$5M monthly volume = \$15,000 in fees → \$4,500-6,000 to YOU
- **\$10M monthly volume = \$30,000 in fees → \$9,000-12,000 to YOU**

PLUS Volume Bonuses:

- Community hits \$500K = \$500 bonus
- Community hits \$1M = \$1,000 bonus
- Community hits \$5M = \$5,000 bonus
- Community hits \$10M = \$10,000 bonus

3. COLLAB & PR STRUCTURE

(Since you're open to collabs and PR):

Option A: Standard Collab

- Feature DecaFlow in your Telegram with your referral link
- Co-branded educational content (trading + privacy)
- Joint AMAs/workshops
- **"SDX Premium Trading Tool"**

Option B: White-Label (If you want to go deeper)

- Custom DecaFlow interface branded with YOUR logo/colors
- "SDX Trading Hub powered by DecaFlow"
- Looks like YOU built it, we handle the tech
- Strengthens your brand as a full-time trader who provides tools

4. FUTURE TOKEN ALLOCATION

When we launch our token: • Your community gets priority allocation • You get personal founder allocation • Ground floor opportunity before public launch

WHY THIS MAKES SENSE FOR YOUR COMMUNITY:

As a full-time trader since 2018, you know the importance of PRIVACY and EXECUTION:

Your members protect their trading strategies (no copycats) They can execute your calls WITHOUT being front-run Whales in your community can trade without revealing positions No MEV bots front-running their entries/exits Cross-chain access = more trading opportunities Telegram bot = trade without leaving your chat **Makes your teaching more effective:** Better execution = better results

This isn't just another "shill this project" ask. This is a TOOL that actually helps your community EXECUTE better (which makes YOUR calls more effective!).

WHAT I'M PROPOSING:

Phase 1: Test with Your Inner Circle • Introduce DecaFlow to your core/VIP members first • Get their feedback on execution quality • See if they find it valuable • Zero pressure, just testing

Phase 2: Full Community Launch • If your inner circle loves it, roll out to full Telegram • Co-branded announcement • Educational session: "Privacy Trading for Full-Time Traders" • Launch with exclusive benefits for your members

Phase 3: Scale Together • Track volume and earnings • Monthly payouts to you in USDC (adds to your full-time trading income!) • Optimize based on community feedback • Build long-term partnership

WHY I'M REACHING OUT TO YOU:

You're not just another "crypto influencer." You're: • A FULL-TIME TRADER since 2018 (you've seen it all!) • TEACHING others to learn trading (educator mindset) • Open to COLLABS and PR (that's exactly what this is) • Building a REAL COMMUNITY (34.3K followers + active Telegram) • Focused on VALUE, not just hype

You care about your community's success. DecaFlow is a tool that actually helps them EXECUTE better (which makes YOU look better as a trader/educator!).

THE ASK:

Would you be open to a 15-20 min call this week to explore this?

I can show you: • How the platform works (trader-to-trader deep dive) • How the tracking/revenue sharing works • How we'd roll this out to your Telegram • How this adds to your full-time trading income • Custom features we could build for your community • White-label options for your branding

If it's a fit, great. If not, no hard feelings. I respect what you're building as a full-time trader.

DM:

Hey Kelvin!

Saw your profile—CEO & Founder of Telecoin and Blockchain Engineer. Your work combining telecoms with crypto is really innovative!

I'm Samuel, founder of @DecaFlow, and I think we have a partnership opportunity that could be mutually beneficial—both for your 47.6K followers and potentially for Telecoin's ecosystem.

QUICK CONTEXT:

DecaFlow is the first privacy-focused cross-chain DEX on Base. We solve a problem EVERY trader faces:

When traders use Uniswap or other DEXs: • Bots front-run their trades • Other traders copy their moves • Their wallets get tracked • Their strategies become public • Zero financial privacy

DecaFlow = PRIVATE swaps + cross-chain bridges (Base, ETH, Arbitrum, Polygon, Optimism, Avalanche) in ONE platform.

HERE'S THE PARTNERSHIP:

I know you're focused on building Telecoin and your blockchain engineering work, but here's how a DecaFlow partnership could benefit your audience AND potentially integrate with Telecoin:

1. VALUE FOR YOUR AUDIENCE (47.6K followers)

Your followers get: • VIP trading fees (0.2% instead of 0.3% = 33% discount) • Priority customer support • Early access to new features • Educational content about privacy trading • Monthly trading competitions with prizes

This adds value to your audience while you focus on building Telecoin.

2. RECURRING REVENUE FOR YOU 💰

Full transparency: We're early-stage with no marketing budget for upfront payments.

BUT here's what we CAN do (and as a fintech founder, you'll appreciate this model): • You get 30% of ALL swap fees from your audience (FOREVER) • Tracked via custom referral link/code • Paid monthly in USDC (real money, not promises) • Completely passive—once they use it, you earn every time they trade • Unlimited upside: the more they trade, the more you earn

Example Math (with your 47.6K audience): - Your audience does \$500K monthly volume = \$1,500 in fees → \$450-600 to YOU - \$1M monthly volume = \$3,000 in fees → \$900-1,200 to YOU - \$5M monthly volume = \$15,000 in fees → \$4,500-6,000 to YOU - **\$10M monthly volume = \$30,000 in fees** → **\$9,000-12,000 to YOU**

PLUS Volume Bonuses: - Community hits \$500K = \$500 bonus - Community hits \$1M = \$1,000 bonus - Community hits \$5M = \$5,000 bonus - Community hits \$10M = \$10,000 bonus

3. POTENTIAL TELECOIN INTEGRATION

(This is where it gets interesting for a blockchain engineer like you):

Option A: Standard Partnership • Feature DecaFlow to your 47.6K followers with your referral link • Co-branded content for your audience • Official DecaFlow Partner status

Option B: Technical Integration (If you want to explore this) • Explore Telecom + DecaFlow integration • **Example:** Telecom users could use DecaFlow for private swaps • Cross-promotion: DecaFlow users discover Telecom • Technical collaboration between two blockchain projects • Mutual ecosystem growth

4. FUTURE TOKEN ALLOCATION

When we launch our token: • Your audience gets priority allocation • You get personal founder allocation (founder-to-founder respect!) • Ground floor opportunity before public launch • Potential for Telecom-DecaFlow token partnership

WHY THIS MAKES SENSE FOR YOU:

As a blockchain engineer and CEO of Telecom, you understand:

Privacy is important: Telecom focuses on telecom privacy, DecaFlow focuses on trading privacy (aligned values!) **Fintech synergies:** Both projects are in fintech/blockchain space **Recurring revenue:** Passive income while you build Telecom **Ecosystem growth:** Your audience benefits from DecaFlow, DecaFlow users discover Telecom **Founder-to-founder:** We're both building in the same space

This isn't just another "sell this project" ask. This is a PARTNERSHIP opportunity between two blockchain projects with aligned values (privacy, fintech, innovation).

WHAT I'M PROPOSING:

Phase 1: Initial Promotion • You promote DecaFlow to your 47.6K followers • Co-branded announcement • Educational content about privacy trading • Launch with exclusive benefits for your followers

Phase 2: Track & Optimize • Monitor volume and engagement • Monthly payouts to you in USDC • Optimize messaging based on performance • Scale what works

Phase 3: Explore Technical Integration (Optional) • If Phase 1-2 goes well, explore Telecoin + DecaFlow integration • Technical collaboration between teams • Mutual ecosystem growth • Long-term partnership

WHY I'M REACHING OUT TO YOU:

You're not just another "crypto influencer." You're: • A BLOCKCHAIN ENGINEER (you understand the tech) • CEO & FOUNDER of Telecoin (founder-to-founder respect) • Building in FINTECH (DecaFlow is also fintech) • Have a SOLID AUDIENCE (47.6K followers) • Joined since 2010 (OG in the space!)

You understand building real products with real value. DecaFlow is solving a real problem (privacy in DeFi), and this partnership could be mutually beneficial for both our projects.

THE ASK:

Would you be open to a 15-20 min call this week to explore this?

I can show you: • How the platform works (blockchain engineer to blockchain engineer) • How the tracking/revenue sharing works • Potential for Telecoin integration • How this benefits your audience • Technical deep dive (I know you'll appreciate this!)

If it's a fit, great. If not, no hard feelings. I respect what you're building with Telecoin.
