

DecaFlow Protocol

Private Liquidity Layer for Base & Beyond

Seed Round: \$500K - \$2M | December 2025

DecaFlow Protocol - One- Pager

**Private Liquidity Layer for Base &
Beyond**

December 2025 | Seed Round: \$500K - \$2M

The Problem

DeFi is transparent by default. Every trade is public, front-runnable, and exploitable.

- **\$1B+ extracted annually** through MEV (front-running, sandwich attacks)
 - **Whales can't move** without market impact and predatory bots
 - **Fragmented liquidity** across chains exposes users to bridge exploits
 - **Institutions won't adopt** DeFi without transaction privacy
-

The Solution: DecaFlow

A **privacy-first liquidity layer** combining confidential routing with programmable DLMM pools.

Core Features

Privacy Flow Engine

CoW Protocol batch auctions hide trade intent and eliminate MEV through dark orderflow routing.

☐ **DLMM Liquidity**

Dynamic Liquidity Market Maker pools deliver 3-5x better capital efficiency than traditional AMMs.

☐ **Secure Cross-Chain**

Chainlink CCIP + Circle CCTP enable trust-minimized bridging across 6 chains (Base, Arbitrum, Optimism, Polygon, Ethereum, Avalanche).

Base Native

Built on Coinbase's Base L2 - low fees, fast settlements, institutional-grade infrastructure.

Market Opportunity

Metric	Value
DEX Annual Volume	\$130B+ (2024)
DEX Total Value Locked	\$8B+
YoY Growth	45%
Annual MEV Extraction	\$1B+

Why Now? - Institutional DeFi adoption accelerating (privacy is requirement, not feature) - Base momentum (\$2B+ TVL, fastest-growing L2) - Privacy regulation clarifying globally (compliant privacy = future) - 70%+ of DeFi users hold assets on multiple chains

Traction

Status: Live on mainnet since December 20, 2025

- ☐ Privacy swap integration (CoW Protocol)
- ☐ DLMM pools deployed
- ☐ Cross-chain bridging (CCIP + CCTP)
- ☐ Multi-chain support (6 chains)
- ☐ Points & rewards system
- ☐ Pioneer 100 program (2x airdrop for first 100 wallets)
- ☐ VDM staking mechanism
- ☐ Leaderboard & quests platform

Early but Growing: - Product is live and functional - Community building through gamification - Partnership discussions with Base ecosystem projects

Business Model

Revenue Streams: - **Swap Fees:** 0.3% per trade (competitive with Uniswap) - **Cross-Chain Fees:** 0.1% premium on CCIP/CCTP transactions - **Privacy Premium:** Optional 0.05% for enhanced privacy routing - **LP Management Fees:** 10% of DLMM pool profits

Revenue Distribution: - 50% → \$DECA stakers (protocol revenue share) - 30% → Liquidity providers (LP incentives) - 20% → Treasury (development & growth)

Conservative Projections:

Timeline	TVL	Monthly Volume	Monthly Revenue	Active Users
6 months	\$10M	\$5M	\$15K	1,000
12 months	\$50M	\$25M	\$75K	10,000
24 months	\$200M	\$100M	\$300K	50,000

Tokenomics: \$DECA

Total Supply: 1,000,000,000 DECA
TGE: Q2 2026
Chain: Arbitrum

Allocation	Amount	%	Vesting
Community & Airdrops	300M	30%	Linear 48mo
Team & Advisors	200M	20%	12mo cliff, 36mo linear

Allocation	Amount	%	Vesting
Seed Investors	150M	15%	6mo cliff, 24mo linear
Treasury & DAO	150M	15%	Unlocked, DAO-governed
Liquidity	100M	10%	Unlocked at TGE
Partners	100M	10%	6mo cliff, 24mo linear

Token Utility: - **Staking:** Earn USDC from protocol fees (15-30% APY target) - **Fee Discounts:** Up to 100% fee waiver for top stakers - **Governance:** Vote on upgrades, fee structures, treasury - **Liquidity Mining:** Earn rewards for providing DLMM liquidity

Competitive Advantage

vs. Uniswap: Privacy + MEV protection

vs. Railgun/Aztec: Cross-chain + DLMM + Base native

vs. CoW Swap: DLMM pools + multi-chain + Base ecosystem

vs. 1inch: Privacy-first, not just aggregation

Our Moat: - ☐ Only full-stack privacy DEX on Base - ☐ Coinbase ecosystem alignment = institutional credibility - ☐ Battle-tested infrastructure (Chainlink CCIP, Circle CCTP) - ☐ Already live (not pre-launch)

Technology Stack

Infrastructure: - Base L2 (Optimism-based, EVM-compatible) - Solidity smart contracts (open-source) - CoW Protocol (intent-based privacy routing) - DLMM Pools (Metemora/TraderJoe architecture) - Chainlink CCIP (cross-chain messaging) - Circle CCTP (native USDC bridging)

Security: - Audits: CertiK, Trail of Bits (scheduled Q1 2026) - Bug bounty: \$100K-\$500K for critical vulnerabilities - Multisig treasury (Gnosis Safe) - 2-day governance timelock

Roadmap

Q1 2026

- Security audits (CertiK/Trail of Bits)
- Strategic partnerships (wallets, protocols)
- Scale to \$10M TVL

Q2 2026

- \$DECA token TGE
- DAO governance launch
- Mobile app (iOS/Android)

H2 2026

- Institutional liquidity pools
 - \$100M+ cumulative volume
 - Expand to 10+ chains
-

Team: Affidex Lab

Founded: 1 year ago (December 2024)

Mission: Incubation lab building core utility projects through blockchain + AI

Track Record: - 3 projects incubated (DecaFlow is flagship DeFi product)
- 2 projects in development - Rapid execution: DecaFlow went from idea to mainnet in under 6 months

Leadership: - Samuel Ut (Founder/CEO) - Serial builder, 1+ year blockchain incubation - Core team: Lead Developer, UI/UX Designer, Community Manager

Post-Raise Hires: - Head of BD - Senior Smart Contract Engineer - Security Auditor - Growth Marketing Lead

The Investment

Seeking: \$500K - \$2M Seed Round

Valuation: \$4M - \$8M pre-money

Use of Funds (12-18 month runway): - 35% → Team & hiring - 20% → Security & audits - 20% → Marketing & growth - 15% → Liquidity incentives - 7% → Infrastructure & tools - 3% → Legal & compliance

What Investors Get: - Equity in Affidex Lab (parent company) - Token rights: 15% allocation (150M \$DECA) - Strategic input + advisory board seat (lead investors) - First right of refusal on Series A

Milestones to Series A: - \$50M+ TVL - \$100M+ cumulative volume - 10,000+ monthly active users - 5+ strategic partnerships - Successful token launch + DAO - 2 security audits completed - \$500K+ annualized revenue

Why Invest Now?

- ❑ **Massive Tailwinds:** DEX volume up 45% YoY, privacy is next frontier
- ❑ **Defensible Moat:** First-mover in privacy + DLMM + Base

- ❑ **Proven Execution:** Shipped production protocol in 6 months
 - ❑ **Clear Path to Revenue:** 3+ revenue streams, sustainable from day 1
 - ❑ **Already Live:** Not vapor - real product with real users
 - ❑ **Institutional Timing:** Privacy regulation clarifying, institutions entering DeFi
