
DECAFLOW

Privacy Infrastructure for DeFi

PRE-SEED ROUND • JANUARY 2026

decaflow.xyz | [@decaflow](https://twitter.com/decaflow)

THE PROBLEM

DeFi users lose \$1B+ annually to MEV extraction.

Every swap on public blockchains is visible. Bots front-run, sandwich, and extract value from users.

\$1.38B

MEV extracted in 2024

68%

Users front-run experienced

\$0

Protocol-level solutions

Existing solutions are band-aids: Private mempools delay the problem. MEV rebates return pennies. Wallet-level protection doesn't scale.

THE SOLUTION ---

DecaFlow: Protocol-level privacy that just works.

First privacy-native DEX aggregator with MEV protection baked into the architecture—not bolted on.

Result: DeFi that protects users by default. No front-running. No sandwich attacks.

WHAT WE'VE BUILT ---

Live on Arbitrum Mainnet since December 20, 2025

38

Real Swaps

0

Security Incidents

100%

Uptime

6

Chains Supported

CORE INTEGRATIONS

- ◻ **Chainlink CCIP** — Cross-chain messaging
- ◻ **Circle USDC** — Compliant stablecoin rails

- ◻ **CoW Protocol** — MEV-resistant execution
- ◻ **Custom DLMM** — Concentrated liquidity

THE PRODUCT

CONSUMER DEX

decaflow.xyz

- Privacy-first token swaps
- MEV protection on every trade
- Cross-chain via Chainlink CCIP
- Gamified onboarding (Pioneer 100)

PRIVACY SDK (B2B)

Privacy-as-a-Service API

- 5-line integration for any protocol
- White-label MEV protection
- API-first architecture
- Enterprise dashboard for partners

"We're not competing with Uniswap. We're the layer Uniswap integrates."

BUSINESS MODEL ---

Revenue Stream	Fee Structure	Target
Consumer Swaps	0.3% per transaction	Retail traders
SDK Free Tier	0.3% ($\leq 1\text{K}$ swaps/mo)	Small protocols
SDK Premium	\$500/mo + 0.1%	Mid-size protocols
SDK Enterprise	Custom pricing	Large protocols

Unit Economics: \$10M partner volume = \$10-30K revenue • 10 B2B customers $\times$ \$5K/mo = \$50K MRR • Path to \$1M ARR

MARKET OPPORTUNITY

\$130B DEX market. \$0 privacy-native infrastructure.

\$130B+

Monthly DEX Volume
Our Position: Privacy layer

\$1.4B+

Annual MEV Extraction
Our Position: Protection infra

\$50B+

DeFi Infrastructure TAM
Our Position: SDK/API play

WHY NOW: Regulatory pressure on privacy • Institutional DeFi entry • MEV awareness mainstream • Infrastructure maturity (Chainlink, CoW, Circle)

COMPETITIVE LANDSCAPE

Protocol	MEV Protection	Privacy Routing	Live Product	B2B SDK
Uniswap				
1inch	Partial			
CoW Swap				
DecaFlow	 AI			

OUR MOAT: DLMM + privacy routing combo is novel • Chainlink/CoW/Circle integrations • Infrastructure positioning • B2B revenue model

TEAM

Samuel Utibe

Founder & CEO

- Web3 builder with deep DeFi and blockchain expertise
- Previously led BD and partnerships in crypto ecosystem
- Track record of shipping products from 0 to 1
- Technical background in smart contracts and DeFi protocols

WHY US

✓ Shipped mainnet product with \$0 budget ✓ Technical depth in privacy + DeFi ✓ Understand both B2C and B2B crypto ✓ Relentless execution

THE ASK ---

Raising **\$500,000** Pre-Seed

\$2M Cap • SAFE or Priced Round • 18 Months Runway

50%

Engineering
\$250K

15%

Security Audit
\$75K

20%

BD & Partnerships
\$100K

15%

Operations
\$75K

TARGET OUTCOMES: \$1M+ monthly volume • 5-10 SDK customers • \$50K+ MRR • Seed-ready metrics

LET'S BUILD THE FUTURE OF DEFI PRIVACY
