

DecaFlow Partnership Outreach - SHORT VERSIONS V2 (Professional)

Your Telegram: @defidboss

Strategy: Professional partnership pitch → They reach out on Telegram → Send full PDF

1. @hidreams__ (Hi Dreams) - 7.2K followers

Hey Hi Dreams!

Saw your growth strategy work with Degen Noobs and Syndicate. Really impressive community building!

I'm Samuel, founder of @DecaFlow - a privacy-focused cross-chain DEX on Base. We're looking to partner with community leaders like you.

The Partnership: We want to integrate DecaFlow into Degen Noobs as your community's private trading tool. Instead of paying upfront marketing fees, we're offering a revenue-sharing partnership where you earn from your community's trading volume.

What this looks like: - You introduce DecaFlow to Degen Noobs as a privacy trading tool - Your members get VIP fees + Telegram bot integration - You earn 30% of swap fees generated by your community - Fully tracked and transparent - paid monthly in USDC

We're Nigerian too and want to work with real builders, not just promote-and-ghost influencers.

If this partnership model interests you, reach out on Telegram @defidboss and I'll send you the full details on how we'd integrate with Degen Noobs.

Samuel

2. @bitlanger (Bitlanger) - 395K followers

Hey Bitlanger!

Your 395K following + educational content on DeFi/NFT/GameFi is impressive. Been following your work for a while.

I'm Samuel, founder of @DecaFlow - a privacy-focused cross-chain DEX on Base. We're looking to partner with educators like you who have engaged communities.

The Partnership: We want to work with you to educate your community about privacy trading while providing them with actual tools to trade privately. Instead of a one-time sponsored post, we're proposing a long-term revenue-sharing partnership.

What this looks like: - You create educational content about privacy trading (fits your educator brand) - Your Telegram community gets access to DecaFlow with VIP benefits - You earn ongoing revenue from your community's trading activity - We can co-brand it or even white-label it for your community

Given your audience size and engagement, this could be a significant partnership for both of us.

If you're open to exploring this, reach out on Telegram @defidboss and I'll send you detailed projections + partnership structure.

Samuel

3. @ubong_007 (Uncle Ubong) - 10.8K followers

Hey Uncle Ubong!

Saw you're a Bybit Ambassador and running Token Tribe. Respect the work you're doing in the Web3 space!

I'm Samuel, founder of @DecaFlow - a privacy-focused cross-chain DEX on Base. We're looking to partner with established KOLs like you.

The Partnership: Similar to your Bybit/Codatta ambassador programs, we want to partner with you to bring privacy trading tools to Token Tribe. The difference: this is a revenue-sharing model rather than fixed ambassador fees.

What this looks like: - You integrate DecaFlow into Token Tribe as a premium trading tool - Your community gets VIP access + Telegram bot - You earn ongoing revenue from the partnership (tracked transparently) - Adds another quality project to your ambassador portfolio

This is a business partnership, not a "shill this token" request. We're building long-term relationships with community leaders.

If you're interested in discussing this ambassador partnership, reach out on Telegram @defidboss and I'll send the full structure.

4. @godly_godsplan (GODLY ♠️) - 10.3K followers

Hey GODLY!

Saw you're doing BD at VictusGlobal and open to PR/collabs. Perfect timing!

I'm Samuel, founder of @DecaFlow - a privacy-focused cross-chain DEX on Base. We're looking to partner with BD professionals like you.

The Partnership Opportunity: We're looking for strategic partners to help us reach trading communities. As a BD professional, you understand the value of performance-based partnerships vs one-time payments.

What we're proposing: - Partnership to promote DecaFlow to your network (X + potential VictusGlobal integration) - Revenue-sharing model based on volume generated - You get ongoing commissions from users you bring in - Potential to structure this through VictusGlobal if that makes sense

Why this makes sense for BD: This isn't a "pay for a tweet" deal - it's an ongoing partnership where your earnings grow with the platform. Better alignment of incentives.

If you want to explore this partnership opportunity, reach out on Telegram @defidboss and I'll send the full BD partnership structure.

5. @ola_crrypt (O La_Crrypt \$B) - 69K followers

Hey La_Crrypt!

Data Science intern at deBridge + SuperteamUK contributor. Love seeing technical people in crypto!

I'm Samuel, founder of @DecaFlow - a privacy-focused cross-chain DEX on Base. We're looking to partner with technically-minded creators like you.

The Partnership: We want to collaborate with you to create data-driven content about privacy trading while building a partnership that compensates you fairly for introducing DecaFlow to your audience.

What this looks like: - You create technical/data-focused content about privacy in DeFi
- Your 69K followers get access to DecaFlow with benefits - We provide you with on-chain data and analytics for your content - You earn revenue from users you bring to the platform - Full transparency dashboard to track everything

Why this fits: - Aligns with your deBridge work (we're also cross-chain) - Good content angle for your technical audience - Can integrate with SuperteamUK if relevant - Performance-based partnership (you see the data)

If you're interested in this technical partnership, reach out on Telegram @defidboss and I'll send details + data access info.

6. @kachi_crypto (Kachi_DE_TA-BEAST) - 26.4K followers

Hey Kachi!

Genesis Academy is impressive - teaching technical analysis to an engaged community. That's real value!

I'm Samuel, founder of @DecaFlow - a privacy-focused cross-chain DEX on Base. We're looking to partner with academy founders like you.

The Partnership: We want to integrate DecaFlow into Genesis Academy as a premium tool for your students. Think of it as adding a "trading execution" module to your technical analysis education.

What this looks like: - Your TA students can execute trades privately (no front-running of their setups) - You add "Privacy Trading" to your Genesis Academy curriculum - Telegram bot integration - students trade right in the academy chat - You earn from the partnership based on your academy's trading volume - Can be white-labeled as "Genesis Academy Trading Hub"

Why this makes sense: Teaching TA is one thing - giving students the tools to execute properly is another. This makes YOUR analysis more valuable to students.

If you want to discuss integrating this into Genesis Academy, reach out on Telegram @defidboss and I'll send the full academy partnership details.

Samuel

7. @sdx_trades (SDX_111) - 34.3K followers

Hey SDX!

Full-time trader since 2018 + teaching others. Respect the grind!

I'm Samuel, founder of @DecaFlow - a privacy-focused cross-chain DEX on Base. We're looking to partner with established traders like you.

The Partnership: We want to work with you to bring privacy trading tools to your Telegram community. Instead of one-time promo fees, we're proposing an ongoing partnership where you benefit from your community's success.

What this looks like: - You introduce DecaFlow to your community as a privacy trading tool - Your members trade without bots front-running them - Telegram bot - they execute right in your chat - You earn ongoing revenue from the partnership - Adds another income stream to your trading career

Why this makes sense: As a full-time trader, you know front-running and privacy issues are real. Your calls are better when your community can execute without being tracked.

If you're open to discussing this trading partnership, reach out on Telegram @defidboss and I'll send the full structure.

Samuel

8. @kelvinking_ (Kelvin king) - 47.6K followers

Hey Kelvin!

CEO of Telecoin + blockchain engineer. Combining telecoms with crypto is innovative work!

I'm Samuel, founder of @DecaFlow - a privacy-focused cross-chain DEX on Base. I wanted to reach out about a potential partnership opportunity.

The Partnership Idea: Two privacy-focused blockchain projects working together. Telecoin focuses on telecom privacy, DecaFlow focuses on trading privacy - there might be interesting synergies here.

What I'm thinking: - Partnership to introduce DecaFlow to your audience - Explore potential technical integration (Telecoin + DecaFlow) - Revenue-sharing model for the partnership - Founder-to-founder collaboration on privacy tech

Why this could be interesting: - Both projects are privacy-focused (aligned values) - Both are in fintech/blockchain space - Potential for cross-pollination of users - Could explore deeper technical integration

If you're interested in exploring this founder-to-founder partnership, reach out on Telegram @defidboss and we can discuss possibilities.

Samuel

DecaFlow | @Decaflow

Summary - Key Differences from V1

V1 Problems (Scammy):

- Led with money ("30% forever!")
- No context about what they'd actually do
- Sounded like MLM/get-rich-quick
- No mention of "partnership" or "collaboration"

V2 Improvements (Professional):

- **Leads with partnership/collaboration**
 - **Explains what they'd actually do** (integrate, educate, promote)
 - **Positions revenue share as compensation**, not the main pitch
 - **Mentions why we're reaching out to THEM specifically**
 - **Sounds like a legitimate business proposal**
 - **References their specific work** (Genesis Academy, Bybit ambassador, etc.)
-

Follow-Up Template (If No Response After 3-4 Days)

Hey [Name],

Quick follow-up on my partnership message.

To be clear - this isn't a "promote our token" request. We're looking to build an actual partnership with [their community/academy/network] where we integrate our privacy trading tools and you benefit from the partnership long-term.

If you're open to a quick conversation about it, I'm on Telegram: **@defidboss**

No worries if it's not a fit!

Samuel

Important Notes

1. **Always say "partnership" not "opportunity to make money"**
 2. **Explain what they'd DO before mentioning compensation**
 3. **Reference their specific work** (shows you actually researched them)
 4. **Sound professional**, not desperate
 5. **Make it clear this is business**, not a scam
-

Next Steps

1. Use these V2 short DMs for X outreach
2. When they reach Telegram, send the detailed PDF
3. On the call, go deeper into the revenue model
4. Close the partnership with clear terms

The goal is to sound like a **legitimate business** reaching out for a **professional partnership**, not like a crypto scammer promising easy money!
