Privacy Swaps

The Problem

DeFi lacks privacy by design and is easily monitored and tracked.

- **MEV Extraction:** \$1B+ extracted via sandwich attacks
- **Privacy Crisis:** All transactions are public
- **Fragmented Liquidity:** Cross-chain transactions are vulnerable to exploits
- **Trust Barriers:** Institutions won't use DeFi
Current DEXs optimize for speed over security

The Solution

DecaFlow is a **privacy-first** routing with programmable

Privacy Flow Engine

CoW Protocol routing hides trade intent through batch auctions and dark orderflow, eliminating MEV exploitation

Secure Cross-Chain

Chainlink CCIP & Circle CCTP integration for trust-minimized bridging across 6+ chains

"Trade privately. Move s

How It Works

Privacy Flow Engine

- User submits trade intent (not public)
- CoW Protocol batches intents into a single transaction
- Solvers compete to find best execution price
- Settlement happens on-chain—zero-knowledge
- Optional privacy quests for enhanced privacy

DLMM Pools

- Liquidity concentrated in active price range

Cross-Chain Security

- CCIP for general message passing
- CCTP for native USDC swaps (no v
- Unified UX across Base, Arbitrum,

DEX Annual Volume (2024)

45%

YoY Growth in DEX Trading

Why Privacy DEXs Now?

- **Institutional Demand:** Funds n
- **Regulatory Clarity:** Privacy ≠ a
- **Base Momentum:** \$2B+ TVL, f
- **Cross-Chain Era:** 70%+ of Del

Traction & Roadmap

LAUNCHED: December 20, 2025

☐ Achieved (Q4 2025)

- Mainnet launch on Base
- Privacy swap integration (CoW Protocol)
- DLMM pools deployed
- Cross-chain bridging (CCIP + CCTP)
- Multi-chain support (6 chains)
- Points & rewards system live
- Pioneer 100 program (2x airdrop)
- VDM staking mechanism

Tokenomics: S

Total Supply: 1,000,000,000 DECA

Allocation

Community & Airdrops

Go-to-Market

Phase 1: Community Building (2026)

- Pioneer 100 incentive program
- Points & quest gamification
- Weekly trading competitions
- Base ecosystem partnerships
- KOL/influencer campaigns
- Twitter Spaces & AMAs
- Discord community growth

Phase 2: Strategic Growth (Q2 2026)

- Wallet integrations (Rainbow, Frame, Wallet)
- DeFi protocol partnerships
- Aggregator listings (1inch, 0x)
- Security audits & certifications
- \$DECA token launch (TGE)
- Liquidity mining campaigns

Competitive L

Protocol	Privacy
DecaFlow	✓ CoW Protocol
Uniswap	×
Railgun	✓
Aztec Network	✓ zk-proofs
CoW Swap	✓
1inch	×

Our Competitive Advantages

☐ Full-Stack Privacy

Only DEX combining CoW batch auction
DLMM pools + cross-chain on Base

☐ Capital Efficiency

DLMM provides 3-5x better capital efficiency
than traditional AMMs

Technology Stack

Core Infrastructure

- **Base L2:** Primary deployment (Optimism, Arbitrum, etc.)
EVM-compatible)
- **Solidity:** Smart contracts (audited, open source)
- **CoW Protocol:** Intent-based privacy
- **DLMM Pools:** Meteora/TraderJoe and others
- **Chainlink CCIP:** Cross-chain messaging and
transfers
- **Circle CCTP:** Native USDC bridging

- React + TypeScript
- RainbowKit wallet integration
- Wagmi hooks for blockchain interaction
- Real-time WebSocket updates

Team

Key Milestones to Series A

- \$50M+ Total Value Locked across
- \$100M+ cumulative trading volume
- 10,000+ active monthly users
- 5+ strategic partnerships (wallet
- Successful \$DECA token launch
- 2 completed security audits with
- \$500K+ annualized revenue run

Why Invest No

Massive Tailwinds

DEX volume up 45% YoY. Privacy is the frontier. Base is the fastest-growing L2.

Proven Execution

Shipped production protocol in 6 months
Live on mainnet with paying users.

- Only full-stack privacy DEX on Base
- Coinbase ecosystem = institutional
- Battle-tested infrastructure (Chainlink, CoW, Circle CCTP)
- Community-first tokenomics (30% to community)
- Already live and operational
